PROFILE

Final-year Bachelor of Computing student and Software Engineer at Finteq, with hands-on experience in .NET backend development, SQL Server, REST APIs and financial transaction-processing systems. Experienced in defect investigation, testing, deployment support and working with ISO 20022 payment flows across development and test environments. My experience representing South Africa and well-known organisations within South Africa, combined with my background in competitive swimming reflects my commitment to excellence and my ability to thrive in high pressure environments.
